

Supporting, speech, language and communication (SLC) at Ash Cartwright and Kelsey

At Ash Cartwright and Kelsey School we understand how important speech, language, and communication skills are for every child's learning, emotional wellbeing, and social development. These skills are the building blocks for success at school and beyond — helping children to build friendships, express their needs, and achieve their potential.

What is speech, language and communication?

- **Speech** is the act of producing sounds that form words, allowing us to communicate verbally. It involves the physical process of using our vocal cords, mouth, and breath.
- **Language** is the words and grammar used to communicate. It's how we express thoughts, ideas, and emotions, whether spoken, written, or signed.
- **Communication** is the process of sharing information, thoughts, and feelings between people. It can be verbal (speech), non-verbal (gestures, facial expressions), written, or visual.

What types of difficulty can children have?

There are many different types of speech, language and communication needs (SLCN). Some examples are:

1. **Difficulties understanding language:** Such as struggling to follow instructions, or understanding what words mean.
2. **Expressive language difficulties:** Difficulty using language to communicate.
3. **Speech sound disorders:** Difficulty producing speech sounds correctly.
4. **Stammering (Stuttering):** Disruptions in the flow of speech.
5. **Social Communication Difficulties:** Challenges with using language in social contexts, such as understanding non-verbal cues or taking turns in conversation.

How We Support Your Child

In Kent, we are using the Balanced System® to help everyone work together to support pupils' speech, language and communication. This means everyone involved in a child's life can work together in a more joined up-way with the speech and language therapy service.

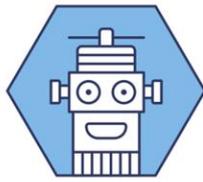

We work closely with our NHS link speech and language therapist, who regularly visits our school. They support us to review and develop our approach, advise staff, and work with individual pupils or small groups where needed.

Our current link therapist is Stephanie Mills

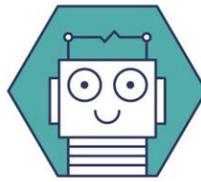

Five Strands

Intervention

Our Commitment – The Five Strands of the Balanced System®

We are working to ensure that...

- We help parents and carers build the confidence, knowledge, and skills to support their child. Pupils are also encouraged to make choices about the support they receive (**Family Support**)
- We create communication-friendly classrooms and learning spaces where every child can understand and express themselves (**Environment**)
- Our staff are trained to spot speech, language, and communication needs and know how to support pupils effectively (**Workforce**)
- We identify any needs as early as possible so children get the help they need quickly (**Identification**)
- Where needed, we provide specific support to help children make progress (**Intervention**)

Levels of Support Available

Every child benefits from support at different levels. Some may need more targeted or specialist help at times in addition to universal support:

- Universal Support – For all pupils. For example, using visual aids, clear instructions, and communication-friendly teaching strategies.
- Targeted Support – For pupils who need extra help. This could include small group work or pre-teaching key vocabulary.
- Specialist Support – For pupils with more complex needs. For example, therapy for a child with a complex speech sound disorder

For more information about the Balanced System® in schools and how speech and language therapy services are working, visit [KELSI](#).

If You Have Concerns

If you have any concerns about your child's speech, language or communication skills, please speak to your child's class teacher first. We will then work together to agree on the next steps.

If necessary, we may discuss your child's needs with our link therapist and develop a plan. You will be kept informed about any plans to support your child.

An important principle of the Balanced System® is ensuring that what matters most to you and your child is central to agreeing on outcomes and setting targets.
