

Adding Fractions

Draw fraction bars to show these calculations. Give the answer as improper fractions and as mixed numbers where possible.

1. $\frac{2}{7} + \frac{3}{7} =$

2. $\frac{2}{10} + \frac{4}{10} + \frac{3}{10} =$

3. $\frac{5}{6} + \frac{3}{6} =$ or

4. $\frac{6}{8} + \frac{3}{8} =$ or

5. $\frac{2}{6} + \frac{3}{6} =$

6. $\frac{3}{5} + \frac{4}{5} =$ or

7. $\frac{2}{4} + \frac{3}{4} =$ or

8. $\frac{5}{10} + \frac{3}{10} =$

9. $\frac{4}{6} + \frac{5}{6} =$ or

10. $\frac{5}{9} + \frac{7}{9} =$ or

11. $\frac{5}{8} + \frac{7}{8} =$ or

12. $\frac{2}{3} + \frac{3}{3} + \frac{2}{3} =$ or

Adding Fractions: Answers

Draw fraction bars to show these calculations. Give the answer as improper fractions and as mixed numbers where possible.

1. $\frac{2}{7} + \frac{3}{7} = \frac{5}{7}$

2. $\frac{2}{10} + \frac{4}{10} + \frac{3}{10} = \frac{9}{10}$

3. $\frac{5}{6} + \frac{3}{6} = \frac{8}{6}$ or $1\frac{2}{6}$

4. $\frac{6}{8} + \frac{3}{8} = \frac{9}{8}$ or $1\frac{1}{8}$

5. $\frac{2}{6} + \frac{3}{6} = \frac{5}{6}$

6. $\frac{3}{5} + \frac{4}{5} = \frac{7}{5}$ or $1\frac{2}{5}$

7. $\frac{2}{4} + \frac{3}{4} = \frac{5}{4}$ or $1\frac{1}{4}$

8. $\frac{5}{10} + \frac{3}{10} = \frac{8}{10}$

9. $\frac{4}{6} + \frac{5}{6} = \frac{9}{6}$ or $1\frac{3}{6}$

10. $\frac{5}{9} + \frac{7}{9} = \frac{12}{9}$ or $1\frac{3}{9}$

11. $\frac{5}{8} + \frac{7}{8} = \frac{12}{8}$ or $1\frac{4}{8}$

12. $\frac{2}{3} + \frac{3}{3} + \frac{2}{3} = \frac{7}{3}$ or $1\frac{1}{3}$
