

KQ: Can I investigate how plants grow from a seed?

What are you trying to find out?

In groups we are going to set up an investigation to find out how different variables can affect the growth of cress seeds.

What are you going to do?

I am going to investigate

What equipment will you use?

Which things will be a constant? (the things that will stay the same)

Which things will be variables? (the things that will change)

What do you **predict** will happen?
